

MY LITTLE PAPER GARDEN ACTIVITY SHEET/ FRONT

Changing your mowing routine and allowing plants to flower in the month of May can create enough nectar for ten times more bees and other pollinators.

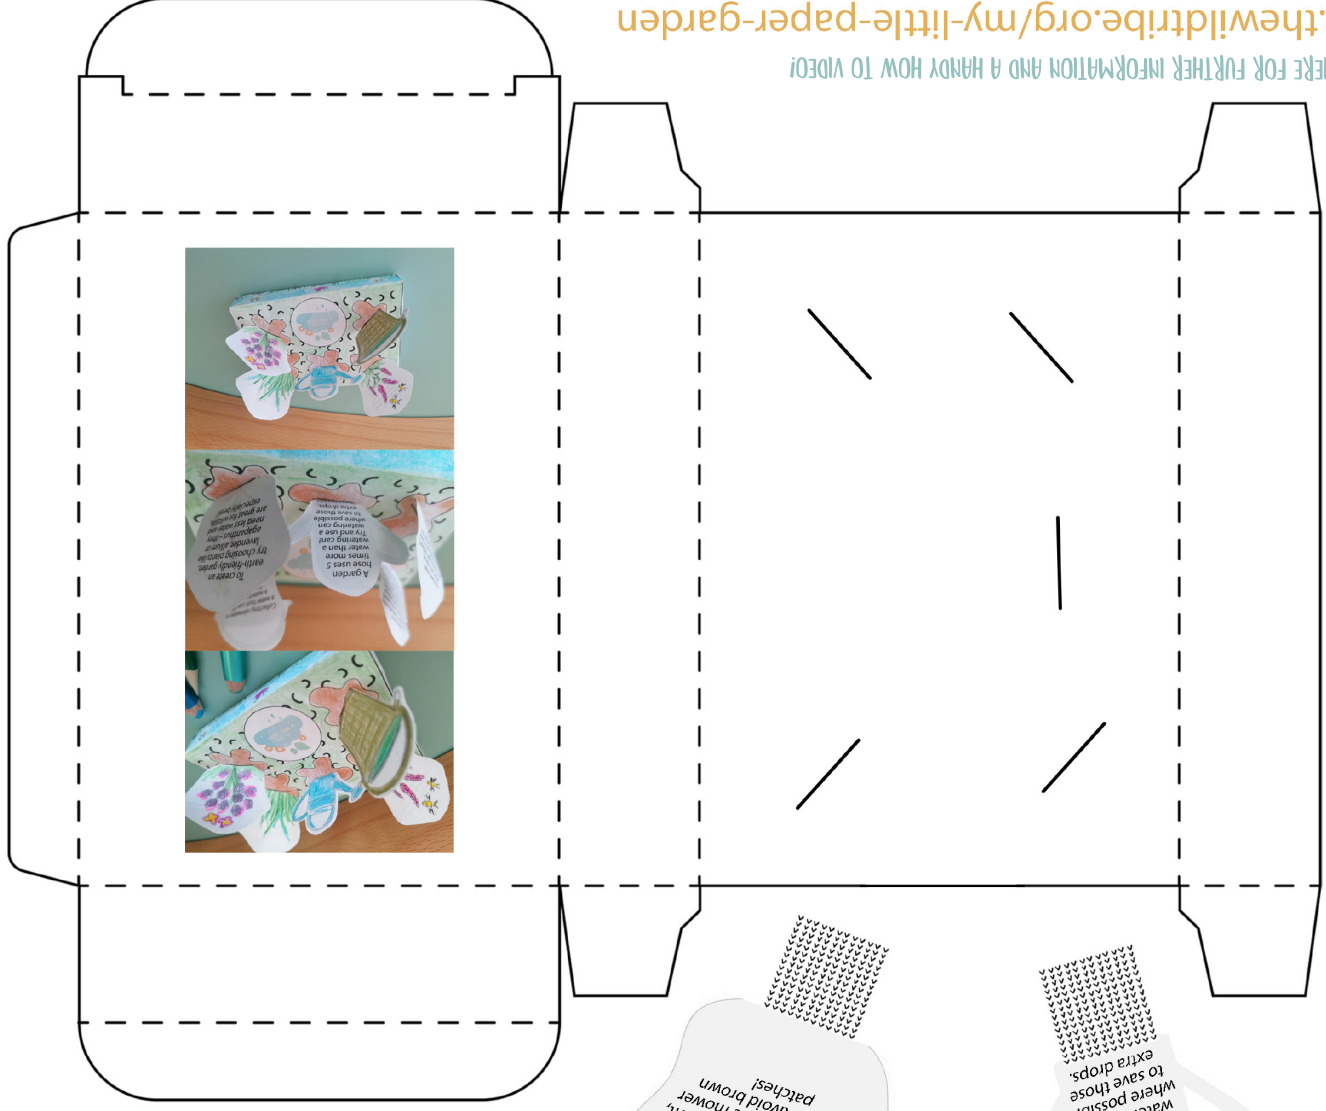

By leaving your grass long you are also more likely to spot a greater variety of flowers popping up in your garden.

Longer lawns mean deeper roots making them more drought resilient, so try raising those mower blades to avoid brown patches!

A garden hose uses 5 times more water than a watering can! Try and use a watering can where possible to save those extra drops.

Changing your mowing routine and allowing plants to flower in the month of May can create ten times more bees and other pollinators. You're also more likely to spot a greater variety of flowers popping up in your garden.

Collecting rainwater in a water butt can fill up a watering can 27 times for free! Simply install water butts or leave out a few containers to collect rain to use in dry spells.

To create an earth-friendly garden, try choosing plants like lavender, allium or agapanthus – they need less water and are great for wildlife, especially bees!
